

Mounting Block for Low-Temperature Devices

Product Description

PH-03 mounting block holds one low-temperature MJ-AB barbed fitting dispensing device and provides a Luer fitting fluid connection and a Molex 70107 electrical connector. Mounting can be made to either a horizontal or vertical surface.

Ordering Information

- PH-03** Mounting block for low-temperature devices.
- MJ-AB-01-xxx** Low-temperature device with barb fluid fitting, xxx denotes orifice diameter in microns.

Support Equipment

The PH-03 may be combined with a fluid reservoir and the following components and subsystems to create a functional subsystem.

- CT-M3-02** JetDrive™ III controller, including command set and stand-alone control program. Includes built in strobe delay. Level 02 firmware (complex waveforms) included.
- CT-PT-01** Pressure / Thermal Controller with no temperature controllers. Includes strobe delay and LED.
- CM-VS-01** Horizontal Optics System: CCD camera, power supply, zoom lens. Reticle projector, right angle adapter, and fine focus included. No monitor.
